

Trends for Emerging Technologies

Christos Chatzidakis
30.04.2023

OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- Top Languages, Databases, Platforms, Web Frames
 - PostgreSQL set to challenge the dominance of MySQL
 - Javascript on the top
 - Linux and Docker
 - The upward trend in jQuery
- The community of developers has a fairly young age average.
- They are predominantly male with undergraduate level of education or even without degree.
- Findings are geographically, fairly US-centric

INTRODUCTION

- The Data Analytics Team is analyzing several datasets to help identify trends for emerging technologies and support the corresponding decision making of the Board of Directors. Such insights and trends would be:
- What are the top programming languages that are in demand?
- What are the top database skills that are in demand?
- What are the most popular IDEs? and
- Demographic data like gender and age distribution of developers.

METHODOLOGY

- Collected the top programming skills from:
 - Job postings
 - Training portals
 - Surveys
- Data Collection Using APIs/Webscraping
- Data Wrangling
 - Finding/Determining Missing Values
 - Finding/Removing Duplicates
 - Normalizing Data
- Exploratory Data Analysis
 - Distribution
 - Outliers
 - Correlation
- Data Visualization
 - Visualizing Distribution of Data
 - Relationship
 - Composition
 - Comparison

RESULTS

PROGRAMMING LANGUAGE TRENDS

Current Year

Top 10 Languages Used

Next Year

Top 10 Desired Languages Next Year

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- Top 3 – Javascript, HTML/CSS, Java
- Noticeable upward trend for Python and Typescript
- Upcoming Bash/Shell/Powershell and Go

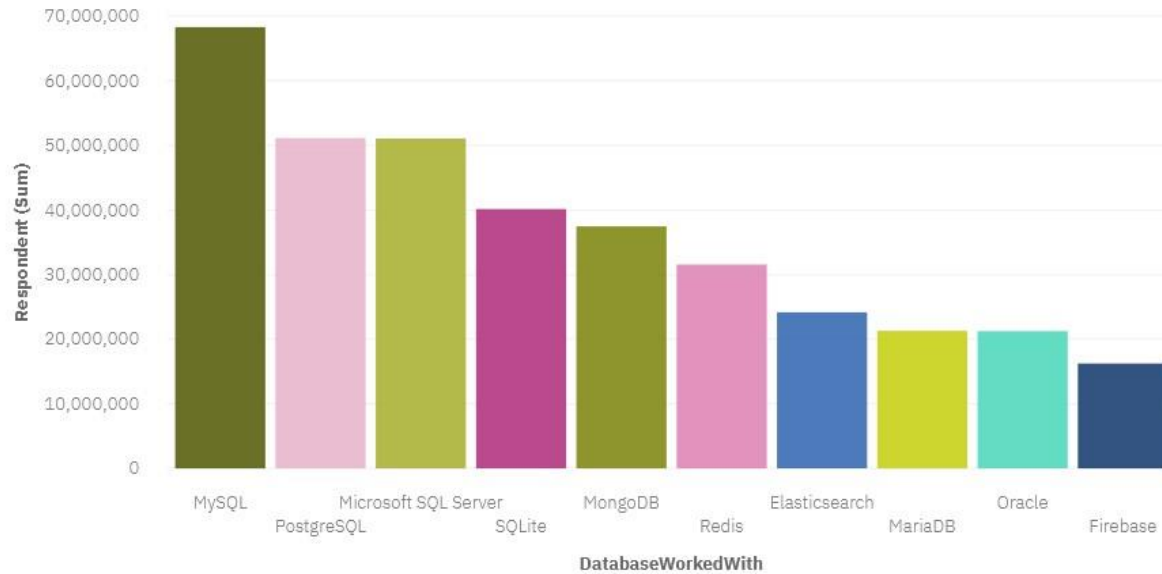

Implications

- Javascript to remain by far the most popular
- Python about to replace Java in the top 3

DATABASE TRENDS

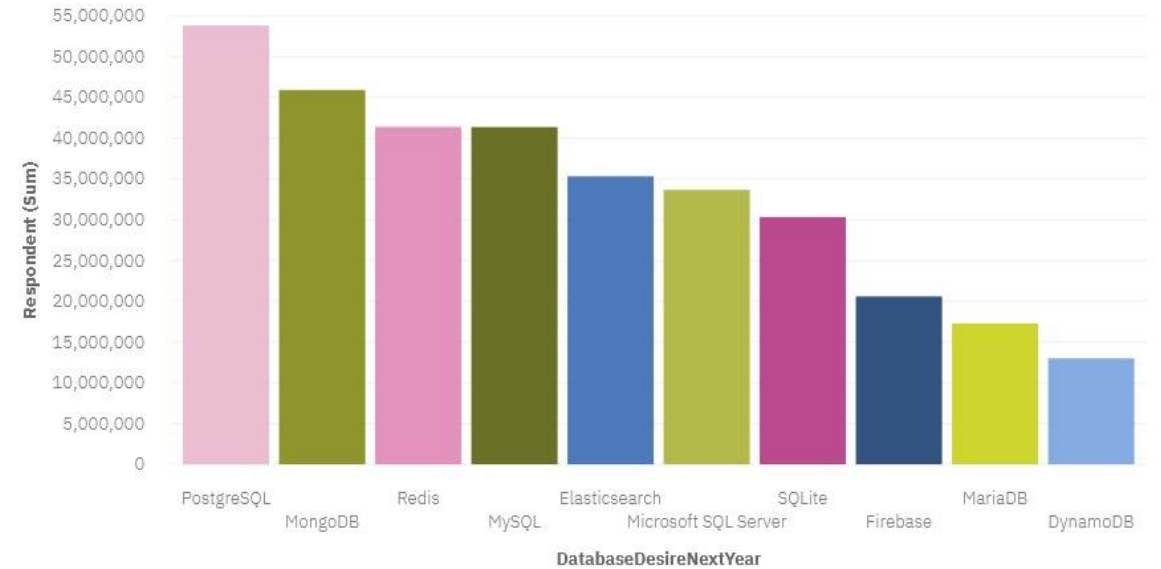

Current Year

Top 10 Databases Used

Next Year

Top 10 Desired Databases Next Year

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- Top 3 – MySQL, PostgreSQL, Microsoft SQL Server
- My SQL diminishing popularity
- PostgreSQL with increasing interest

Implications

- PostgreSQL to challenge MySQL as the top Database
- Redis and MongoDB to increase their current numbers significantly

DASHBOARD

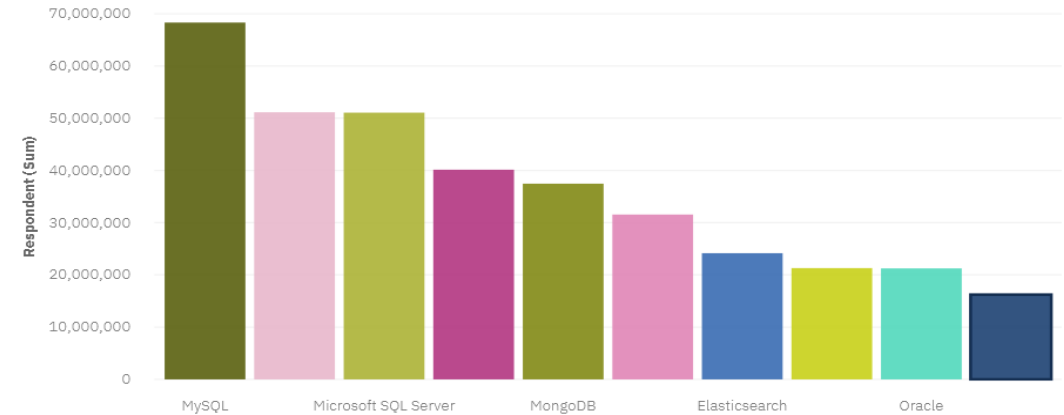

<https://eu-de.dataplatform.cloud.ibm.com/dashboards/31b48c90-5ffa-47b4-a029-7cfeacde0f59/view/5b7baa3c23b111c56bfcc0e407992e5428337158b3bb8003d1827b4906327197a83a1698c82b1a08d8155162f4ea175bcf>

Current Technology Usage

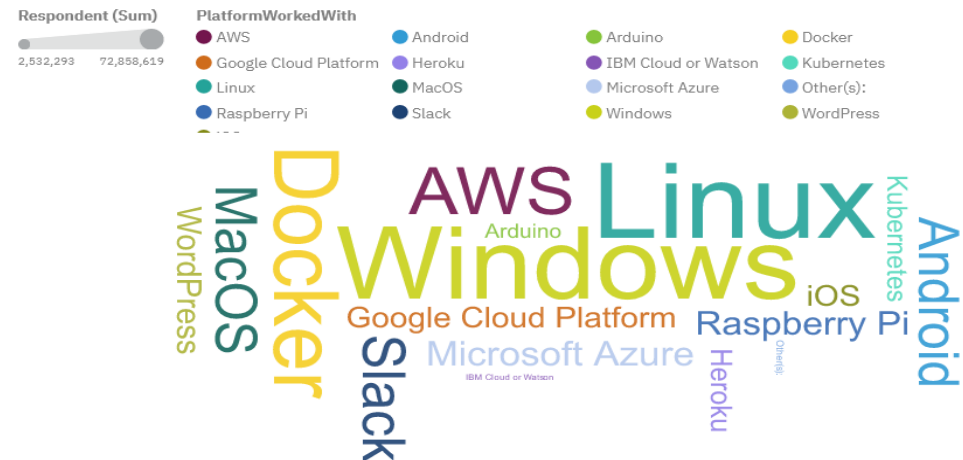

Top 10 Languages Used

Top 10 Databases Used

Platforms Used

Top 10 Web Frames Used

Future Technology Trend

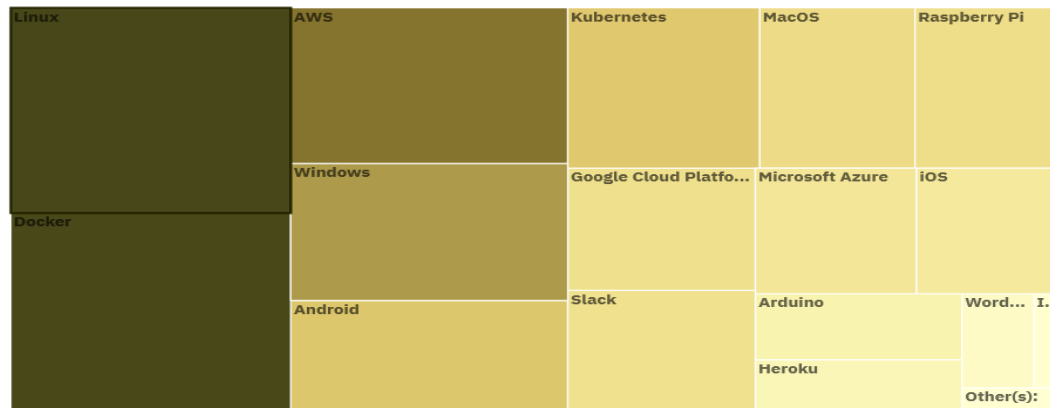

Top 10 Desired Languages Next Year

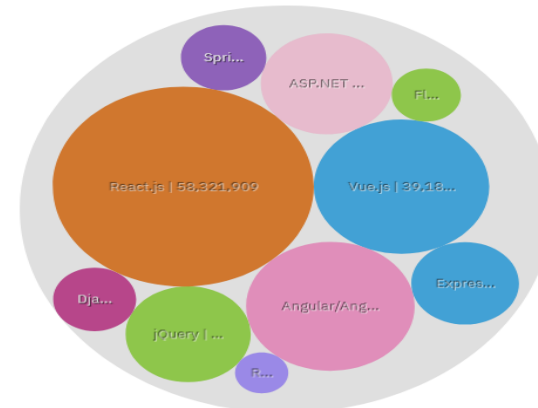

Top 10 Desired Databases Next Year

Desired Platforms Next Year

Top 10 Desired Web Frames Next Year

Demographics

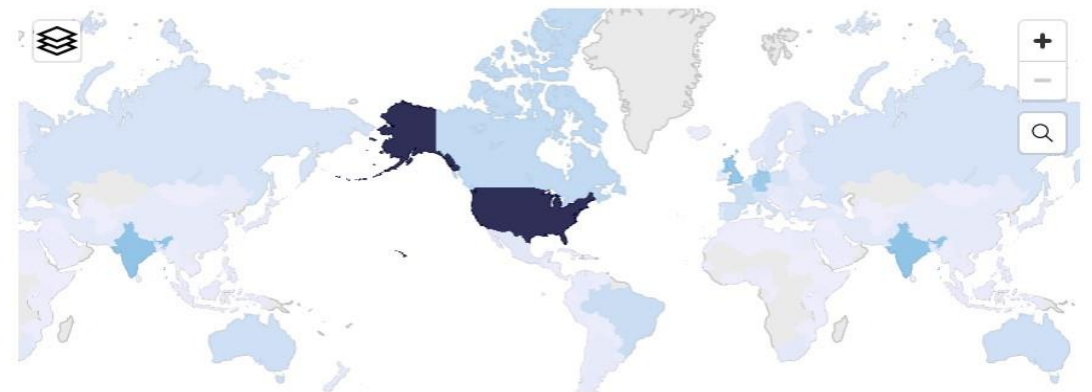

Respondents by Gender

Gender
● Woman ● Man

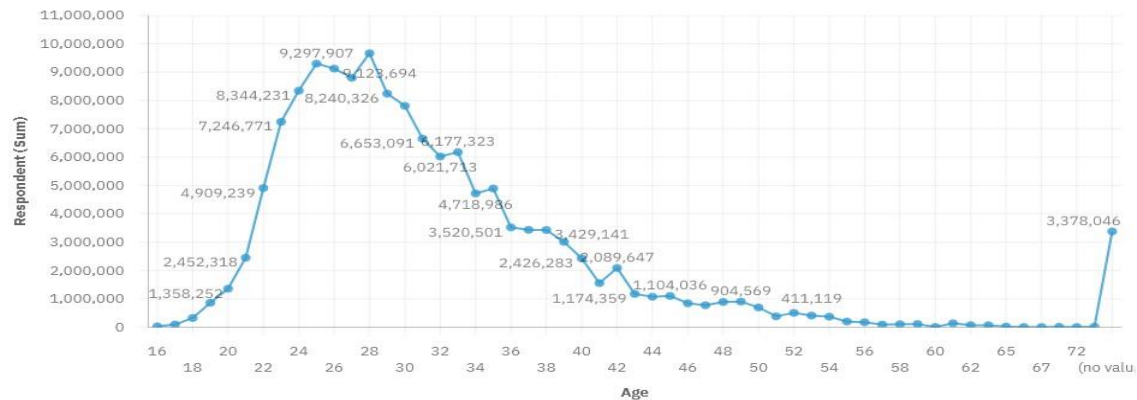

Respondents by Country

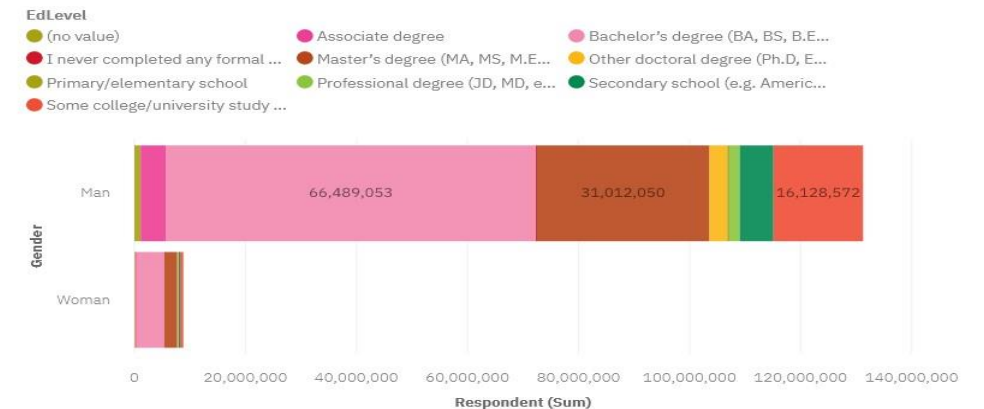

Respondent (Sum)
865 38,170,293

Respondents by Age

Respondents by Gender/Educ. Level

DISCUSSION

OVERALL FINDINGS & IMPLICATIONS

Findings

- Javascript, HTML/CSS & PostgreSQL, MySQL most popular in their fields respectively
- Big portion being in the field with a bachelor degree or even no degree at all
- The community of developers is largely male between the age of 25 and 30

Implications

- It's a dynamic area as the dominant languages and database may change if the identified trends turn out to be long term.
- Stepping in the developing community does not necessarily require over the top studies
- The demographics clearly describe the type of person that will determine the future course of the field

CONCLUSION

- The examined timeframe spans across this year and the next one therefore the trends do not lead to long term conclusions.
- The findings are solid though in terms of the dominant languages, databases, platforms and web frames.
- The above findings are not to be interpreted as global trends as US respondents are proportionately higher.

APPENDIX

A closer look at
the US market.
Findings from the
US job postings
data.
